

Job Description: Python Developer – Data & AI

Bengaluru, India

We are seeking a motivated **Python Developer** with a strong foundation in data analytics and machine learning. The candidate should be skilled in **Pandas**, **NumPy**, **Matplotlib**, and capable of building maintainable solutions for data processing and analysis.

Key Responsibilities

- Develop and maintain Python-based data processing pipelines
- Perform data cleaning, normalization, and visualization
- Integrate ML models into production workflows
- Collaborate with cross-functional teams using Git and Jupyter

Requirements

- Proficiency in **Python programming**
- Experience with **SQL/PostgreSQL**
- Familiarity with **Django framework**
- Hands-on experience using **Jupyter Notebook**
- Understanding of **AI/ML concepts**

Preferred Qualifications

- Experience in academic or open-source Python projects
- Knowledge of Scikit-learn or Seaborn
